## Product Description

Com IoT23 series is a 4G industrial core module developed, designed and produced by Shenzhen Movingcomm Technology Co., Ltd. It is a highly integrated small 4G cat4 LTE module. Supporting a maximum downlink rate of 150 Mbps and a maximum uplink rate of 50 Mbps. It has good cost in performance. In addition, it is compatible with multi-network standards LTE and UMTS/HSPA+ and support seamless switching between 4G and 3G networks.

This modem in the module is based on the ASR chipset solution. It has rich network protocols, supports multiple drivers, and the USB drivers are suitable for Windows, Linux, Android and other operating systems. It is widely used in the Internet of Things fields such as equipment networking, unmanned self-service equipment, industrial routers, and Raspberry Pi applications. The sim card slot supports NANO SIM and featured with anti-wrong way insertion self-bouncing card slot, better quality and higher durability.

Com IoT23 series supports multiple Quectel module series: EC200T series, EC200S series, EC200A series and EC200 series, which can satisfy the frequency band coverage of different countries and regions.
