Product Description

ComIn-SL41H is a small-sized enterprise-class POE switch. The product is equipped with 1 Gigabit uplink port, 1 Gigabit SFP port and 4 x 10M/100M/1000M adaptive electrical ports. Each network port supports a maximum of 30W POE power supply, and the switch supports a maximum of 95W POE power supply. The product has the characteristics of high performance, easy installation, and easy maintenance, which greatly saves manpower and material costs in the network deployment. Products are widely used in such as small and medium-sized enterprises, conference rooms, urban villages, hotels, Internet cafes, shopping malls and other places.

Product Features

- Designed for CCTV/Security/Wireless AP Area
- PoE chipset support 802.3af/at standard, which have overcurrent and overload protection, once the current to PD device is too high, it will cut off to make sure safe to use. Much safer and long life compared with same cheap PoE switch with MCU (Micro Controller Unit).
- Design product life is 3 years, with high frequency low resistance capacitor, guarantee the more stable performance.
- Single port support IEEE 802.3at protocol, maximum PoE power up to 30W, comply with all IEEE 802.3af/at standard PD equipment.
- Can customize 250 meters PoE power if need
- Products passed rigorous testing in package loss rate, PPM, load detection.
- 100~240V wide voltage design, can work well all over the world.
